

Rapid Broadband Kit

Secure, Reliable & Portable Connectivity

Instant, secure & reliable Internet. Anywhere

Do you typically work in remote location(s), or find yourself working in an area that has poor broadband coverage?

Our Rapid Broadband Kit (RBK) is designed to be a portable broadband solution that provides instant connectivity in even the most distant of locations.

Rapid Broadband Kit (RBK) – What's it all about?

The RBK is an Ultra-Rugged field connectivity platform. It is a battery-powered, rapidly deployable communications unit that combines 5G, LEO Satellite and Ethernet-based routing in a single rugged enclosure. Build for use in harsh environments, it enables secure, high-bandwidth connectivity in minutes – anywhere, anytime.

This means the RBK can be set up anywhere, especially in areas that typically experience poor or limited connectivity. In the event of a fixed-line outage, an RBK can be plugged into an existing network to provide WAN connectivity for disaster recovery.

Key Capabilities

- Multi-WAN Uplink: 5G, LEOSat and ethernet combined
- 100+ Concurrent Users via Wi-Fi / Ethernet
- Up to 45 hours Battery Life (5G only)
- Power Options: Internal battery / 12v vehicle / AC mains
- IP6X Rated (Weather Resistant)
- Power output for charging peripheral devices

Built for Agility

Connectivity anywhere

Suitable for instant Internet access, even in remote locations where a fixed-line broadband solution would take months to install.

Robust & rugged

Made with an IP6X-rated case, the RBK is durable enough to perform in many harsh working environments.

Increase productivity

No more walking around trying to find signal. Simply power on and connect to secure and fast Internet.

Flexible purchase options

Choose the solution that fits your needs—whether it's just the hardware, a ready-to-use kit, or a fully managed service with support and data included.
